

PLANT MIX BITUMINOUS SURFACE LEVELING FIELD SECTION 402

402.1 Scope. To establish procedures for mix design of plant mix bituminous surface leveling. Ingredients for use in plant mix bituminous surface leveling are to be inspected in accordance with the applicable sections of this Manual. Trial mix aggregate samples shall be submitted in accordance with [Field Sec 1001](#) of this Manual. Plant calibrations, if requested, shall be performed in accordance with [General Sec 10](#) of this Manual. The inspection and acceptance procedures for bituminous mixture release agents for haul trucks shall be in accordance with the applicable requirements of [Sec 403](#) of this Manual.

402.2 Procedure. Mix design procedures are identical to those shown in [Field Sec 401](#) of this Manual. If it becomes necessary to calculate a mix, the formulae procedure and reporting shall be performed as described in [Field Sec 401](#) of this Manual.
